

Luis Felipe Volpato Alves

Staff Software Engineer · Tech Lead · Scrum Master

mail.for.luis.alves@gmail.com · (415) 272-9149 · SF Bay Area, USA · linkedin.com/in/luisfvalves · github.com/finxster · finx.dev

SUMMARY

Senior software engineer with 17+ years across the full software lifecycle — UX, analysis, design, development, testing, and deployment. Experienced on backend-only, backend + frontend, and backend + mobile projects, acting as Developer, Tech Lead, or Scrum Master / Agile facilitator depending on the team's needs. Strong entrepreneurial streak: founding engineer at X4Fare and PayAqui, co-founder of fleeber (now amy.network), and currently building AtipicALI. I lead by example, enjoy working with non-technical stakeholders, and turn ambiguity into shipped products.

TECHNICAL SKILLS

Backend: Java (8–21), Spring Boot, Spring WebFlux, Kafka, Hibernate, Drools, Python, REST, JMS, SOAP

Frontend & Mobile: React, TypeScript, JavaScript, Flutter, Swift (iOS), Android, JSF, Wicket

Cloud & Data: AWS (EC2, RDS, SQS, S3), Databricks, Oracle, SQL Server, PostgreSQL

DevOps & Tooling: CI/CD, GitHub Actions, Jenkins, Bamboo, Maven, Gradle, Git, Liquibase, JHipster

AI & Practices: AI / LLMs, Agentic AI, GitHub Copilot, Codex, TDD/BDD, JUnit, Mockito, Scrum, Kanban

PROFESSIONAL EXPERIENCE

Avenue Code

2022 – Present

Staff Software Engineer · Tech Lead

SF Bay Area, USA — Remote

- Lead technical initiatives across supply chain, logistics, data engineering, and AI programs for Fortune 500 retail organizations.
- Built the proof of concept for a strategic internal rules platform, helping leadership validate the replacement of a commercial solution and establish the foundation for future AI initiatives.
- Coordinated the migration of approximately 20 microservices from Java 11 to Java 21, defining technical guidelines, documentation, and rollout practices.
- Designed and implemented an operational engineering dashboard adopted across multiple teams, providing visibility into service health, deployment status, and environment availability.
- Implemented automated Jira workflows for operational incident tracking and service monitoring.
- Contributed to AI-assisted engineering practices through development workflows, prompts, documentation, and implementation standards.
- Developed data processing and simulation solutions using Python and Databricks for retail planning and forecasting initiatives.

Tech: Java, Spring Boot, Spring WebFlux, Python, Databricks, AWS, Kafka, Drools, SQL Server, Oracle, Jenkins, AI-assisted development

X4Fare

2020 – 2021

Founding Engineer

São Paulo, Brazil — Remote

- Helped build an early-stage transit fintech startup from concept to production deployments.
- Delivered backend, web, and mobile applications supporting digital wallet and transaction processing products.
- Learned Flutter and became a key contributor to the mobile platform to accelerate product delivery.
- Participated in hiring, interviewing, onboarding, and mentoring engineers as the team expanded.
- Created onboarding processes that enabled new developers to contribute production code within approximately two weeks.
- Acted as a technical reference across backend, mobile, and product discussions.
- Supported deployment and operation of customer-facing production systems.

Tech: Java, Spring Boot, Flutter, React, AWS, JHipster, Liquibase, GitHub Actions

Avenue Code

2015 – 2020

Senior Software Engineer · Tech Lead

São Paulo, Brazil -> USA

- SquareTrade: one of the first three engineers to start the account in Brazil — the work grew the team to 30+ people. Worked on Merchant Integrations (Apache Camel, Apache Zookeeper); acted as Tech Lead, Scrum Master, and 'Buddy' (managerial mentoring role).

- Merchant e-Solutions: traveled to Redwood City, CA to help the company achieve AMEX certification, working on-site.
- Williams Sonoma: built microservices on top of a Sterling application layer; helped the team build dashboards in pure JS/HTML plus Bash scripts.
- GAP · PIM / Data Governance: led and mentored the team on unit and integration tests for Kafka, replacing the product catalog (Pacman) with Stibo and publishing standardized data into a Kafka cluster; also served as Management Mentor.

Tech: Java, Spring Boot, Kafka, JMS, SOAP, Apache Camel, EJB, JUnit, Mockito, Gradle, Swagger, Bash, Jenkins, Oracle, SQL Server, PostgreSQL

MAPS Soluções e Serviços

Senior Software Engineer · Tech Lead
São Paulo, Brazil

2005 – 2015

- Designed and implemented a tax calculation engine used for liability control of investment funds.
- Led development of regulatory and business-critical features for financial systems serving banking clients.
- Acted as technical lead, scrum master, product owner, and mentor depending on project needs.
- Gathered requirements directly from clients, prioritized backlogs, and translated business rules into software solutions.
- Mentored approximately twenty engineers throughout multiple projects and teams.
- Participated in architecture discussions, technical planning, and delivery coordination for financial platforms.

Tech: Java, Spring, Hibernate, Oracle, PostgreSQL, AWS, Wicket, Maven, Jenkins

Faculdade Cásper Líbero

IT Intern
São Paulo, Brazil

2002 – 2005

- Maintained the university's computer labs, supported students with technical issues, and automated administrative routines.

Tech: Bash Scripting, JavaScript

ENTREPRENEURIAL VENTURES

AtipicALI

Co-founder

2025 – Present

An active parallel venture started in 2025 alongside full-time work, still running today.

PayAqui

Founding Engineer · Mobile

2018 – 2019

Founding engineer of a side payments venture. Designed and built the native Android and iOS apps end to end — from architecture to shipping — while also owning requirements discovery and UX, and contributing to the Java backend.

fleeber (now amy.network)

Co-founder

2013 – 2015

Co-founded a social network for musicians with three applications (public app, back-office, and Studios ERP). Responsible for all technical decisions and most of the development, using a BDD approach, an Apache Lucene search engine, and AWS infrastructure. Continues today as amy.network.

EDUCATION

Bachelor in Computer Science

Pontifical Catholic University of São Paulo (PUC-SP)

2002 – 2009

LANGUAGES

Portuguese (native/bilingual) · English (full professional proficiency)

CERTIFICATIONS

- PSM — Professional Scrum Master, Scrum.org (2017)
- MCD — Integration & API Associate, MuleSoft (2018)
- KMP I — Kanban Management Professional, Kanban University (2015)
- Building High-Performing Teams, Stanford University (2020)
- An Introduction to Agile Project Management, Stanford University (2020)
- Swift & TDD/Unit tests, Managing projects with Scrum (Alura, 2015) · UX & Usability (Adaptworks, 2014)
